

Quality Certificate

”Matching Quality Parts”

Issued by

KLOKKERHOLM KAROSSERIDELE A/S
9320 Hjallerup • Denmark

Klokkeholm Karosseridele A/S hereby declares that – in our opinion - the products sold by our company are of a matching quality to the parts they shall replace.

Many of the products have been certified and thus approved by international certifying organisations such as TÜV in Germany, Thatcham in Great Britain, and Centro Zaragoza in Spain. At the same time, Klokkeholm Karosseridele A/S also carries out an extensive checking of the products before they enter the product range of the company.

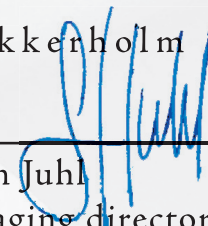

As all parts have not yet been certified by an independent certifying organisation, these parts, however, will be subject to certain exceptions according to the definition of the EU regulation 1400/2002 - Now replaced by EU regulation 461/2010 - regarding certifying of Matching Quality Parts.

Furthermore a number of our products do not exist as OE parts and therefore the definition Matching Quality Parts has no meaning.

The production at Klokkeholm Karosseridele A/S is carried out in consideration of all approved rules and procedures concerning environment and security, and of course Klokkeholm Karosseridele A/S vouches for the quality and for the guarantee of all the products sold.

Date: 1/6 2010
